

GIVEN AWARD—Edward Murray (third from left) is shown receiving the President's Medal for saving a fellow worker's life last June at the Joliet Arsenal. Murray successfully applied artificial respiration to save the life of a man who had come in contact with a high tension wire. Presenting the medal is Herbert Morgan, district supervisor for the Blaw-Knox construction for whom the men had been employed at the time of the accident. Looking on is Martin Ward (left), representative of the Chicago union, and William Downey, of the Joliet steamfitters union. The presentation was made in the Arsenal cafeteria Friday.
